

ENGEN

Models for Success: How Community Colleges Use EnGen to Open Opportunity

Community colleges & adult education providers across the U.S. are tapping EnGen to connect immigrants, refugees, and speakers of other languages with English AND career skills to access opportunity in high-demand sectors. Here's how:

ENGLISH "BOOTCAMP" PROGRAMS

Competency-based language programs fast-track learners into credential programs. Digital platforms like EnGen complement in-person instruction.

Emily Griffith Technical College uses EnGen's career-aligned courses, such as English for Certified Nursing Assistants, to prepare learners for technical training programs in healthcare and beyond.

INTEGRATED EDUCATION & TRAINING

IET programs that include holistic, career-aligned language support prepare learners for career success.

Austin Community College uses EnGen to open career pathways for Internationally Trained Professionals, connecting learners with English, career skills, and tools to search for jobs, network, and prepare for interviews.

PRE-APPRENTICESHIP PROGRAMS

Career-aligned English upskilling creates an effective on-ramp to connect adult English learners with pathways to apprenticeships

ADVANCE, a workforce development network that includes Lake Tahoe Community College, tapped EnGen to make its Ski Lift Apprenticeship program more accessible to immigrants and refugees.

CROSS-CAMPUS PROGRAMS

Pathways personalized to learners' academic and vocational interests, real-world goals, and proficiency levels open opportunities to students enrolled in for-credit, non-credit, and community-based programming.

EnGen serves speakers of other languages across Miami Dade College's many departments, including recently arrived refugees, learners enrolled in academic pathways, and other students in workforce education programs that lead to high-demand careers.

THE ENGEN SOLUTION

EnGen is built with technology that has served over **4 million language learners** worldwide. EnGen helps learners reach their goals – at work and at home:

95% improved their confidence in using English

92% improved their English proficiency

87% achieved a career or social goal
